

Call for Hibernation Operators

Humble Wonder is looking for **Hibernation Operators** for the opening of the brand-new **Calgary Municipal Space Station** during Beakerhead 2017 in the Calgary Tower.

The year is 2047 and we're inviting people to the grand opening of the world's first municipal space station! Calgary's public transit system now features direct service via space elevator to the Calgary Municipal Space Station – but what good is a space station unless there is another station to blast-off to? Guests will have a chance to launch up, have their say on where the next space station should go, and party like it's 2047!

Hibernation Operators will help bring the CMSS to life by running the hibernation simulators for guests on the upper observation deck! These hibernation pods simulate what it would be like to go into hibernation to travel from Earth to Trappist 1-e, another potential inhabitable planet. (The journey would take about 40 years!) The upper observation deck will have various elements that guests can interact with at their leisure, including four hibernation pods.

Responsibilities include:

- Ensure all equipment is functioning prior to guests arriving and continuously throughout the day
- Instruct guests in the simple directions for the simulation
- Begin the recordings of each pod independently from a master hub when a guest sits down for the simulation
- Troubleshoot solutions if there is a malfunction

We are looking for people who:

- Know enough about sound equipment and audio software to operate four independent Bluetooth headphones from one computer source
- Encourage guests to experience the simulation and instruct them in their use
- Be available **September 12-17, 2017** for approximately 6 shifts with flexibility for training potentially a few days in advance
- Nerd out on space! (*not required, but extra points*)

The honorarium is **\$200.00**.

TO SUBMIT: Submit applications with **"Beakerhead CMSS"** in the subject to **Lara Schmitz** by e-mail at lara.schmitz@gmail.com by **Thursday, August 31, 2017**. Please include:

- Résumé focusing on relevant sound or tech experience
- Availability September 12-17, highlighting any larger commitments
- A short blurb on why you are interested and would be a good fit for this project

More information on the project can be seen here:
